

Hagerty Consulting

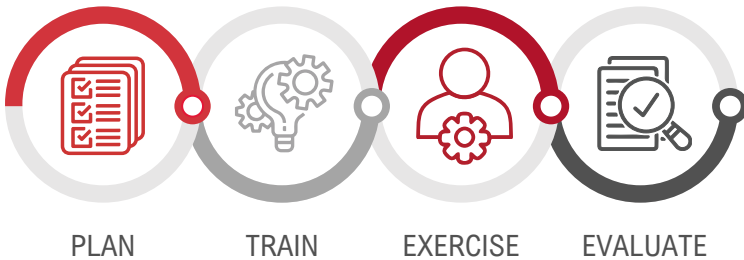

Preparing for the Future

Organizations globally face the challenge of implementing efficient emergency preparedness and risk management programs to sustain response levels and protect communities in a rapidly evolving threat landscape.

As new threats emerge and existing threats increase in frequency, complexity, and magnitude, stakeholders must adopt a proactive and comprehensive approach to emergency preparedness, utilizing industry guidance and best practices to mitigate current and future risks. **Hagerty can help.**

The Hagerty Advantage: Innovative, Integrated Solutions

At Hagerty, our team of professionals serves clients across all levels of government and public and private sectors to support communities in reimagining preparedness programs and tools.

- ✓ Our professionals can offer extensive subject matter expertise throughout all phases of emergency management, including Preparedness, Response, Recovery, and Mitigation.
- ✓ We are emergency managers with direct experience implementing the same programs and capabilities we help our clients build.
- ✓ We collaborate with interdisciplinary teams and leverage policy, guidance, and technology to deliver solutions that align with industry best practices.

WHO IS HAGERTY?

Hagerty Consulting, Inc. (Hagerty) is a full-service consulting firm that helps clients prepare for, respond to, and recover from disasters.

Hagerty has supported local, tribal, state, government and private sector clients through every major disaster since 2001.

We blend exceptional management consulting skills with the industry's deepest programmatic expertise to produce innovative strategies and results for our clients.

Investing in Infrastructure Resilience

Infrastructure plays a crucial role in supporting communities – providing physical structures, facilities, and services required to support community operations and business continuity. These important structures, and affiliated services, are vulnerable to manmade and natural threats, as well as cascading impacts given the many interdependencies between infrastructure systems. Infrastructure providers and their response partners should consider how they can enhance their infrastructure’s resilience to reduce vulnerabilities and improve recovery outcomes. Hagerty offers planning, training, and exercise services to support all infrastructure sectors in building and implementing effective strategies to reach resilience.

Hagerty has supported projects across the following infrastructure sectors:

- Energy
- Commercial
- Cyber and Communications
- Healthcare and Public Health
- Food and Agriculture
- Housing
- Financial
- Transportation
- Water and Wastewater
- Universities and Higher Education

Preparedness Expertise When Needed Most

AFTER-ACTION REPORTS (AAR)

Support the creation, review, and improvement of policies and procedures based on feedback from past response and recovery experience through comprehensive AARs.

RISK AND REGULATORY GAP ASSESSMENTS

Conduct robust risk and regulatory gap assessments to assess past, current, and future risks to health, safety, and property by utilizing well-established data collection and analysis processes.

FULL-SCALE AND TABLETOP EXERCISES

Design, develop, and conduct table-top and full-scale exercise scenarios to enhance knowledge of preparedness plans, identify necessary mitigative measures, and improve capabilities to respond to real world events.

EMERGENCY OPERATIONS PLANNING

Develop and enhance scalable, all-hazards emergency operations plans that most effectively leverage organizational resources, personnel, and capabilities.
